

CEMENT

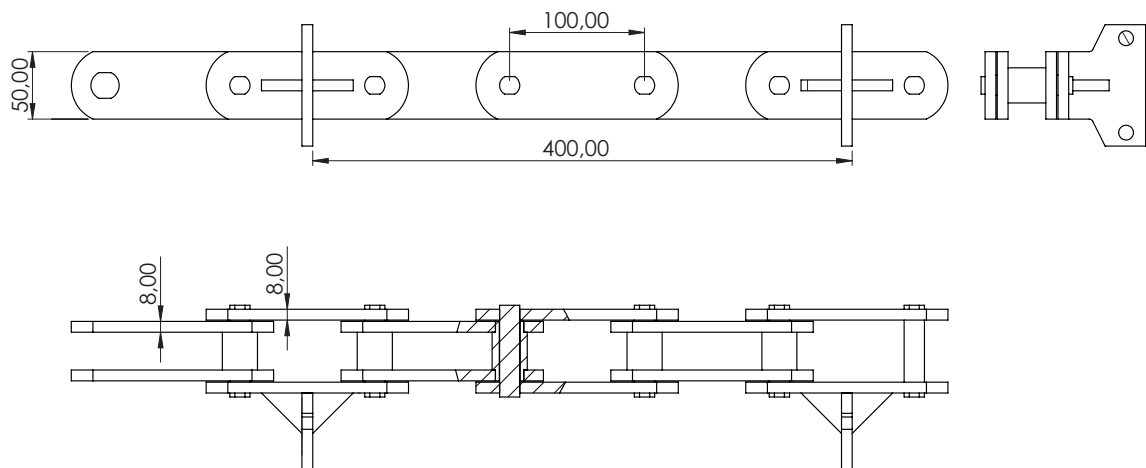

- MKS Cement P: 100
- MKS Cement P: 250 Double Side Attachment
- MKS Cement P: 250 Single Side Attachment
- Cement P: 152 With U Type Attachment

Our most powerful business partners are those that serve for basic needs like construction. We manufacture the chains belonging to this sector specially; for the usage in bulk material handling environments having hard and fine particles such as cement, lime, gypsum, salt and potassium salts. Our aim is to provide superior strength and maximum durability in our chains that are made of high strength steel. And that is why the wear resistance of the chains is extremely high. With our heat treatment, these chains are resistant to abrasive and coercive forces in the carrier elevator. Our chains in this sector are; stone extraction chain, feeder chain, excavator, scraper chain, flat or inclined conveyor chain and forging chains.

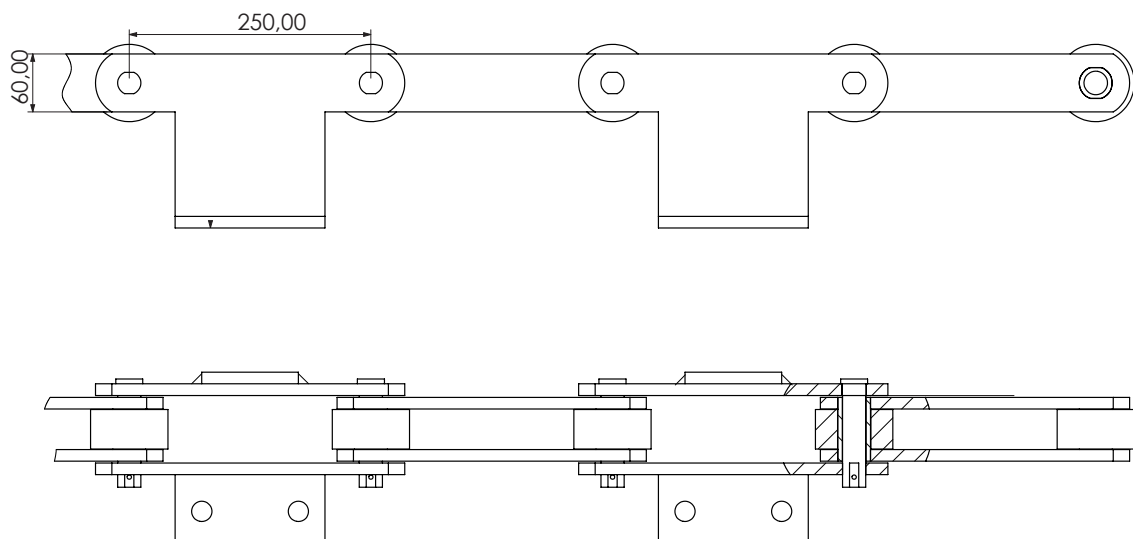

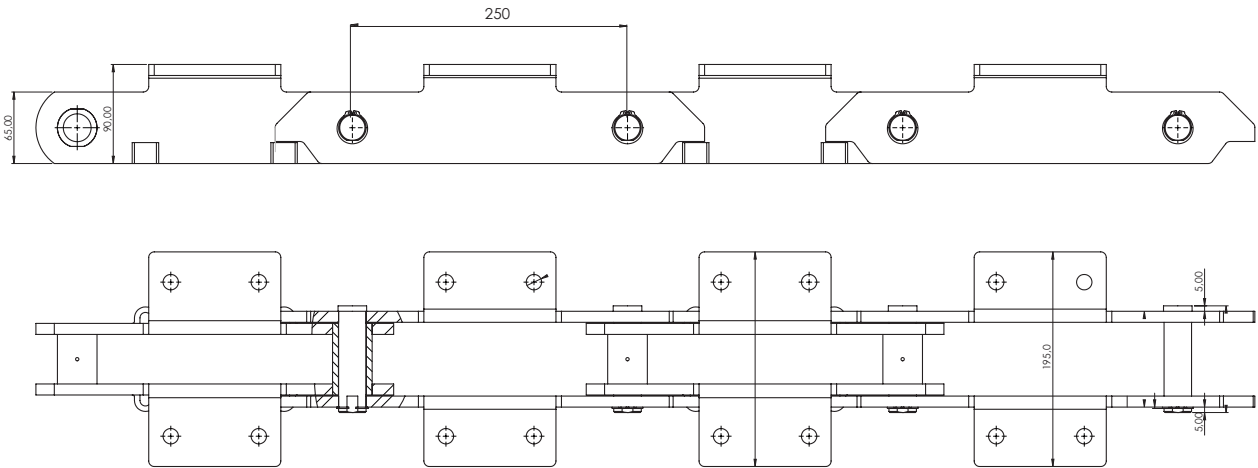

MKS Cement P: 100

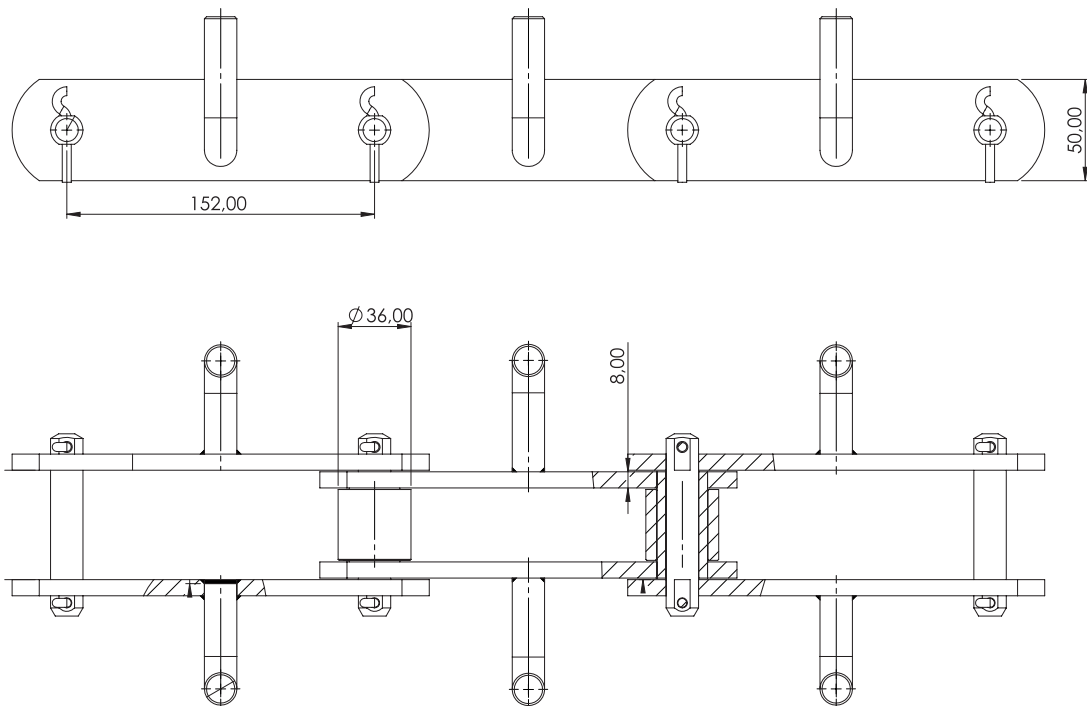

MKS Cement P: 250 Single Side Attachment

MKS Cement P: 250 Double Side Attachment

Cement P: 152 With U Type Attachment
