

Certificates

**Our chains are keeping
your industry move forward**

PRODUCTION PROCESS

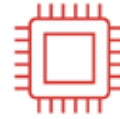

Production Planning

We make technical drawings of chains and sprockets together with our suggestions to obtain the approval of our customers.

Production

Depending on the approved product, we make bush, spool, pin and link cuts. In special production to achieve even the most delicate tolerances we apply laser cutting.

Heat Treatment

Rotary type, continuous hardening, tempering furnace in various ovens in different processes and harden to the desired degree of hardness and then temper.

Mold Preparation

We have more than 3000 molds in our factory.

Quality Control

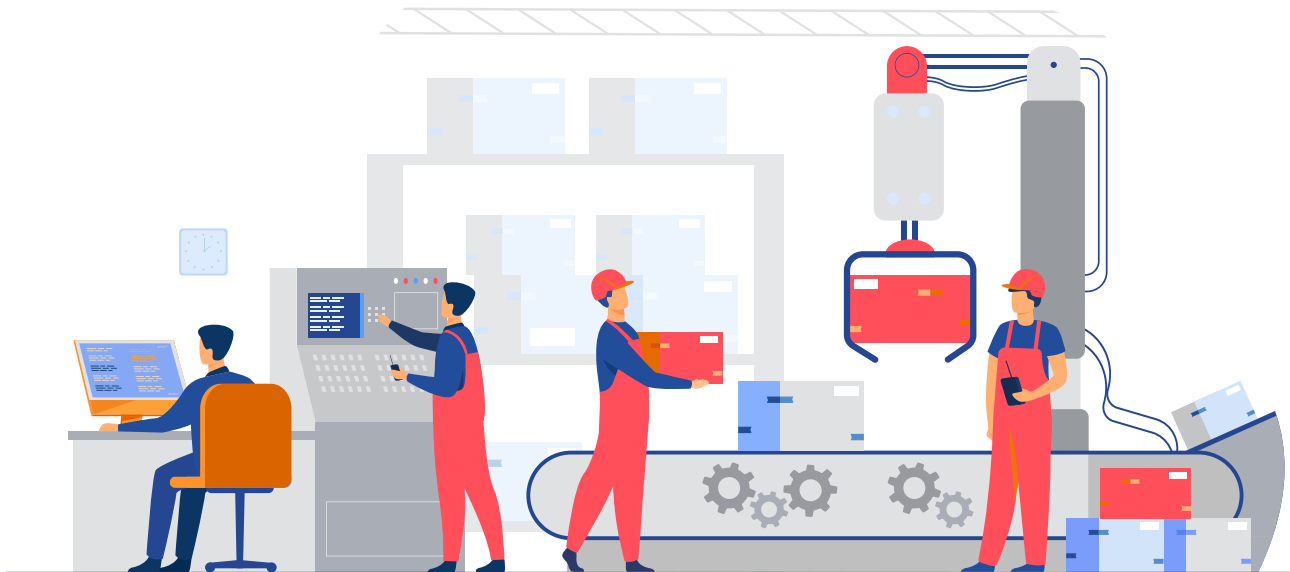

We apply the following QC steps to all our chains;

- Breaking load
- Tensile strength
- Elongation
- Hardness measurement
- Crack control.

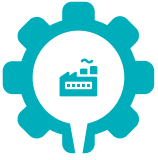

Assembly

After the heat treatment is completed, the links, bushing, pins and sprockets are mounted on the assembly line and the chain is assembled

INDUSTRIAL PRODUCTION

Bespoke production

We have made to order production range with project based bespoke moldings.

Consultancy

We share the best technical solutions upon our expertise.

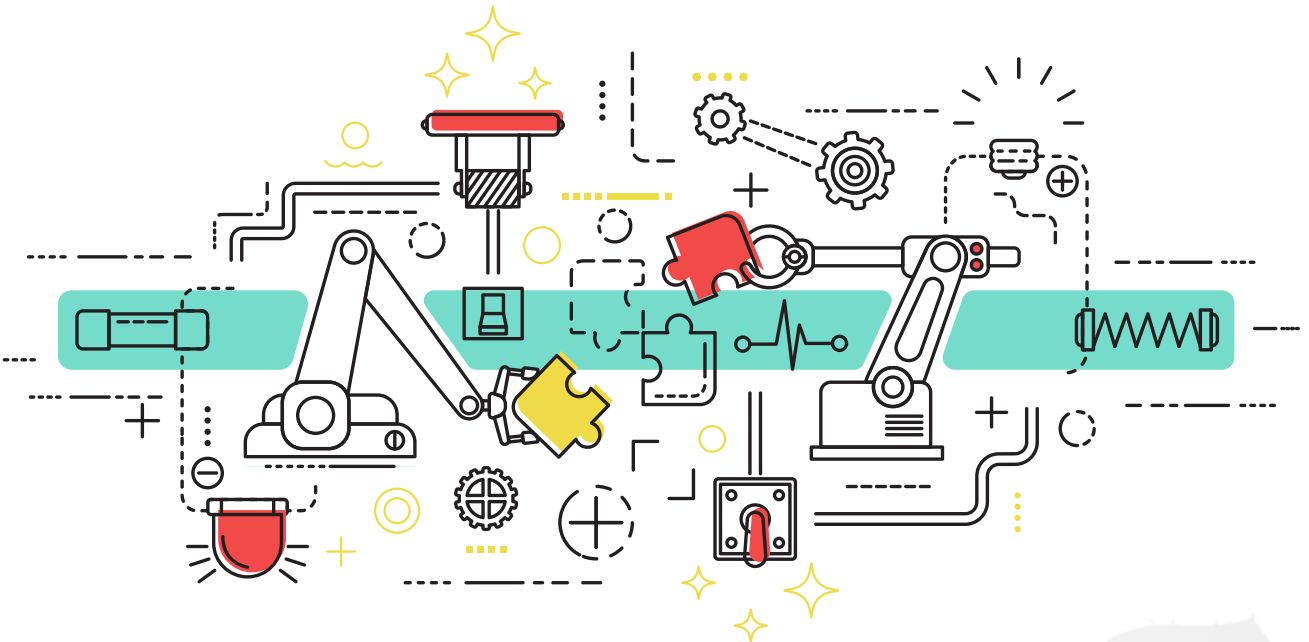

Just in time

We provide on time services and products.

Guarantee

We provide a warranty of any possible failures due to the production error.

**Revolving strong
for over 40 years**
